Subject: 1st Quarter Water Data

Dana and Pam, the water data is ready to be loaded into the database for Dugout, Solider and Banning.

However, in the Dugout file there is one file not oked which needs to be deleted, I tried but the message was that the file did not exist, will you see if you can erase it. Also, I could not get the visual oil and grease parameter to work and where to I put how many hours the flow discharged in the database. I looked but could not find it. Thanks, Vicky
